

(a) Green and blue dominate attribution

Mean |SHAP| computed OUT-OF-FOLD: each observation is explained by the feature value. Greener water relative to the prediction toward less transparent water. Trimmed (18 extreme points out)

(b) How Green/Blue acts on the prediction

SHAP Red: the feature value. Greener water relative to the prediction toward less transparent water. Trimmed (18 extreme points out)

(c) Only transparency is retrievable in this water

Random Forest with the same honest design (campaign blocking) for each variable.

The negative claim is subject to the same rigor as the positive one
